✨ SUMMARY

Results-driven Data Scientist with a strong foundation in Python, statistics, and machine learning. Over 7 years of combined experience in electronics, data analytics, and teaching. Certified in Data Science from TripleTen, with hands-on experience in solving real-world business problems. Skilled in translating complex data into actionable insights and collaborating across teams.

⚖️ SKILLS

Python | SQL | Pandas | NumPy | Scikit-learn | LightGBM | Excel | SPSS | R | Data Visualization

🔧 TECH PROJECTS

Customer Churn Prediction for Beta Bank | 06/2025 | [GitHub](#) | [Demo](#)

Predictive model to identify customers likely to leave the bank using classification algorithms.

- Built churn prediction model using logistic regression, decision trees, and LightGBM (F1: 0.6152, AUC-ROC: 0.8312).
- Performed EDA, feature engineering, imbalance handling, and tuned models with cross-validation and visual insights.

Hourly Taxi Order Forecasting for Sweet Lift | 05/2025 | [GitHub](#) | [Demo](#)

Forecasting NYC taxi demand by the hour using time series analysis.

- Developed hourly taxi demand forecast using LightGBM with lag features and rolling stats; RMSE < 48.
- Used time-based cross-validation; insights helped optimize driver allocation during peak hours.

Gold Recovery Prediction from Flotation Plant | 04/2025 | [GitHub](#) | [Demo](#)

Regression model to predict gold recovery efficiency in a mining plant.

- Analyzed full-cycle mining data from raw feed to final concentrate.
- Built ML models using sMAPE; identified key factors impacting gold recovery.

🏠 EXPERIENCE

PayMore Cash for Electronics | Store Associate | 12/2024 – Present | Ellicott City, MD.

A retail electronics company specializing in buying/selling refurbished gadgets.

- Managed diagnostics and listing of used electronics for resale.
